**Context Sensitive Health Informatics**

A joint IMIA sponsored **pre-MedInfo conference** from the Human Factors Engineering and the Organizational and Social Issues in Health Informatics IMIA working groups will be held in Copenhagen at the prestigious **Danish Institute for Medical Simulation at Herlev Hospital on August 17th and 18th, 2013**.

Socio-technical effects on clinical systems interact with the systems user-centered design to affect the usability of clinical systems. Knowing that these systems affect the quality and safety of care that patients receive, it is of the utmost importance that we work to understand these interactions so that we can better serve the patients and their families that have entrusted to us their care.

We encourage you to submit to this important, stimulating and informative meeting which brings together these two related working groups to share their talents and energies and to lead a discussion that will outlast surely this meeting.

Accepted papers will be published by IOS press and will be indexed in Medline.

Deadline: **February 8th, 2013**

Please submit papers of up to 6 pages in the **IOS press format** with abstracts of 100-200 words to **papers@cshi2013.org**.

Manuscripts that address both Socio-technical and related to Human Factors will be given the highest priority by the scientific program committee, however all submissions will be reviewed.

Please join us and help the Informatics community to better understand the interaction between and best practice of Socio-Technical Health Informatics and Human Factors Engineering in Health Informatics. For more information see: [http://www.cshi2013.org/](http://www.cshi2013.org/)

Sincerely yours,

Program committee
